Sadly, November Meeting and Awards Banquet Are Cancelled

The November meeting is cancelled. Again. Seems like we are in a situation much like the movie *Groundhog Day*.

The Board sent out a survey about the possibility of having a November social but a majority of those participating voted against having it. Also, during the Board meeting on October 29, the Board voted to cancel both the November meeting and the Christmas awards banquet.

As it turned out, all this was moot, as with a surge in people testing positive for Covid-19, the recently re-elected Governor Cooper issued an Executive Order pausing Phase 3 of coronavirus restrictions.

Governor Cooper announced that due to the latest data, the state would stay paused in its current Phase 3 and that the indoor gathering limit would be adjusted from 25 to 10 people.

This Executive Order will go into effect on Friday, Nov. 13 and will be in place through Friday, Dec. 4.

Hopefully we can resume meeting in 2021, likely with some restrictions. The Club had a lot of momentum going into this year only to have in-person meetings stopped due to COVID-19 restrictions.

Be safe, go fishing and send in reports and pictures and, if a Facebook user, add to the Club's Facebook page and send in Fishing Report Cards.

Club Shirts: We have 2020 Club T-shirts and Performance shirts available for purchase. See that page in this news letter.

Fishing For Speckled Trout

Several back-to-back mild winters has produced a great crop of speckled trout in NC. The Club will be holding two 'functions' to capitalize on our good fortune!

The Club will hold a Speckled Trout Tournament for the longest Speckled Trout caught between November 14, 2020 through December 31, 2020.

The Speckled Trout must be caught in North Carolina Waters by a club member in good standing (2020 dues paid) and cannot be a Gray Trout.

A photo must be taken on a credible measuring device and sent to **Ron Reijerkerk** reijerke@gmail.com who will be the final Judge should there be any disputes.

The prize will be Penn II 3000 Rod & Reel Series Combo. .

Speckled Trout Outing December 5th

Greg Brissette is heading up a **Speckled Trout Outing** the first Saturday of December (5th).

Chuck Ward sent out a Sign-Up Genius for interested captains on November 10th. If you didn't get an email, contact Chuck cward@nc.rr.com

Please sign up if you are interested and able to provide a boat. Captains are encouraged to not only enjoy the adventure with their fishing buddies, but to also extend an invitation for others to join the crew, whether they have speck fishing experience, or not.

Please indicate your boat's name and how many additional fishermen, besides yourself, that you will be able to accommodate. If you have a full boat, please advise so that I do not put you down as having openings. The outing is set for Saturday, December 5th, out of your home port. Only fish caught on that Saturday will count for our "friendly" competition.

Pictures of your largest fish along with measurement details must be submitted to Bernie McCants (bernie.mccant@gmail.com) for entry into the newsletter. .

We are on the honor system. Official VHF Channel is 10.

Crew fishermen will be expected to help with fuel and bait costs. You will coordinate those purchases directly with your crew.

A separate sign-up will go out for fishermen, once the boats have been lined up.

RSWSFC Board Meeting Minutes Thursday October 29, 2020

Vice-President Kevin Clemmer called a virtual BOD meeting to order at 7:00 PM. *Board Members Present:* Robert Carroll, Tripp Adams, Greg Brissette At-large members; Ron Reijerkerk Treasurer; Bo Nowell Newsletter Editor; and Fred Adams Secretary.

Board Members Absent: Chuck Ward, Tommy Peace, Tommy Walls, Bernie McCants

Treasurer's Report: Ron Reijerkerk reported Dues were due September 1, 2020. Invoices have been sent. Please mail payment to the club Address:

Family \$60, Individual \$50

Raleigh Saltwater Sport Fishing Club
P.O. Box 41427
Raleigh, NC 27626

Ron reported the Club had collected \$5,185 from dues and sponsor memberships. Presently the Club holds an inventory of KMT T-shirts & long sleeve nylon performance shirts available for sale. Current expenses and dues collected show the club is running a loss of (\$1,013.94) as of October 29, 2020. By selling KMT shirts, collection of additional dues, and the reduced 2020 meeting expenses, the club should be able to be able to return to the "Black" or remain at cost neutral.

New Business:

President Kevin Clemmer reported the results of the club survey sent out to club members. Of those who responded, it was a resounding NO to hold a club meeting or have a November club social.

Motion #1

Greg Brissette moved, and Tripp Adams seconded to cancel the November 2020 RSWSFC Social, and the RSWSFC 2020 Christmas Party. Motion Passed Unanimously.

Outings: King Mackerel Outing is scheduled November 7, 2020 Robert Carroll is the chair of the event. Captain/ Membership sign-up was sent using Signup Genius.

Motion #2

Fred Adams moved, and Robert Carroll seconded to hold a RSWSFC Speckled Trout Tournament for the longest Speckled Trout caught between November 14, 2020 through December 31, 2020. The Speckled Trout must be caught in North Carolina Waters by a club member in good standing (2020 dues paid) and cannot be a Gray Trout. A photo must be taken on a credible measuring device and sent to Robert Carroll who will be the final Judge should there be any disputes. The prize will be Penn II 3000 Rod & Reel Series Combo. Motion Passed Unanimously.

Trout Outing Saturday December 5th

The club trout fishing event weather permitting, Greg Brissette chairman

Look for a Captain Sign-Up Genius and a participant's sign-up. Boat Captains & fisherman may fish from anywhere along the NC Coast.

Old Business:

David Daniel submitted his resignation as RSWSFC Membership Chairman. The BOD would like to thank David for his service and interest in growing the membership and the betterment of the club, his contributions will be greatly missed!

Communications Committee Report:

Tripp Adams reported the club's new website is ready to be launched at a cost of \$250 for 3 years. Tripp said he was in the process of collecting information out of the old site to be transferred to the new site from Jason Fant. The new site using WIX will have email ability and "plug-ins" etc. However, Tripp did stress that over time club may need to invest better software and email system.

Club Schedule 2021

Boat Show: Bass & Saltwater Fishing Expo is scheduled January 8th – Sunday January 10, 2021
(at the time of this BOD boat show is still scheduled)

-Send Fish Cards to Bernie!

-Dale Ward Scholarship: N/A

-Business Card Ads are available at \$130 for New Letter/Website etc.

FISHING REPORTS

From RSWSFC FaceBook Page for those that don't follow the Club on FaceBook.

From **Brad Harvey** posted Oct 23.

“Good afternoon in front of Ocean Isle. That is 6.13 lb Spanish on top of that King.”

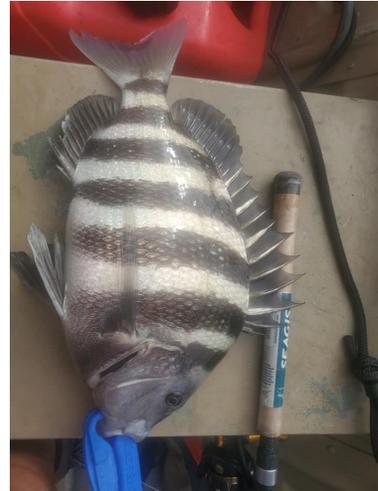

From **David Woodleif** from October 10th:

“Surf fishing over the last few days were not that productive except for two nice reds hit a double hook bottom rig at the same time! My best red times two!”

Ian Perma from October 26:

“Good day in Southport! First time filling a cooler. “

The King Mackerel Outing Nov 7, 2020

From Robert Carroll : Captains signed up on Genius, One canceled prior to outing, I met up with Robert Makowsky and Michael Singleton at the Radio Island Boat Ramp before sunrise.

We launched boats and took off for NW Places, water conditions were not to bad, cruised out about 25 mph. Stopped about two miles short to fish temp break, no luck, first bite came in northern edge of reef in 72-degree water, a very fat false albacore, bite was steady on cigar minnows on top. I only fished two lines at a time. We managed 3 kings and multiple albacore.

Ended the day when a big lemon shark swallowed one of the albacore at the boat and took us for a ride for about an hour then released the albacore back to me. I removed tackle and threw the fish back out to have the shark return and eat it again. (See pictures below).

Tired, we decided to call it a day. Packed up and headed inn. We weighed fish at Chasin tails in Atlantic Beach. Heaviest is 12 pounds exactly caught by my daughter, Cherise.

Robert and Michael came in with one king. No sure they had it weighted. I've reached out to others that signed up and have not gotten a response from one and they other had something that came up last minute and had to cancel.

From Robert Makowsky: The morning started calm and the ride out in our bay boat was pleasant, especially trailing Robert Carrol's boat.

Trolling was unproductive, no matter what speed (3-6 mph), depth (surface down to 20 ft), or rig we tried with our cigar minnows.

Our hookups came when we stopped for various reasons. Sometimes almost immediately, sometimes 20 minutes later. We bottom fished for some live bait, which was successful in procuring bait, but not so successful in enticing kings.

As the day went on, the waves decreased in period and increased in amplitude, making the ride back a forgettable one.

We did boat a nice false albacore and a nice king, along with a dozen or so other various catches, although we did not stop to get the king officially weighed.

Team BaitWasters 2020—Bernie McCants

I first started fishing the Cape Hatteras Anglers Invitational Team Tournament with the RSWSFC team in 1984, the first year we got an invitation. This is an extremely well-run, competitive 100-team tourney (back then, now 120 teams) and I had been fishing Hatteras Island since the mid-70's. and loved to spend a week there with the challenge of a tournament.

There were a lot of surf fishing enthusiasts in the Club back in the eighties and competition for a spot on the team was fierce, The only top three from the previous year were guaranteed and I was lucky enough to keep fishing on the Club team. After a few members were less than serious and who you fish with when fishing is slow is important, I decided to put my name for a team if any teams dropped out.

Forward to 1999 with the Club team of Paddock Wales, Bo Nowell, Max Turner, Frank Swartz, Ed Beckon and me. In the first day, first session, Paddock and I tomahawked the bluefish and coupled with an big-fish-in-the tourney false albacore by Bo and a nice puppy drum by Ed, the RSWSFC took home the trophy!

In 1990, I was 'fortunate' to be on Hatteras Island when a barge broke loose during a storm and knocked out a section of Bonner Bridge. I chose to stay for 6 more days until the evacuation died down and the fishing was great! Met some great folks that turned into life-long friends. No tournament that year so I guess we were back-to-back champions.

In 1992 my name came up, and The BaitWasters were in the tourney. I was sensitive about 'stealing' experienced members from the Club team, so I asked club members Freddie Sinclair, IB Nichols from the Club's Nags Head tourney "A" team (another story) Max Turner and Dick and Jim Emerson, brothers I had met when the bridge was out.

So, this year was year 29 for the BaitWaster. I have gone through a lot of iterations over the years with 20 different anglers fishing on the team. We've had some success and been close to the top several times, but we fish hard and have a great time.

This year the CHAC tourney was cancelled due to Covid, so we had a week of 'fun' fishing. The BaitWasters team Ver 17.3 consisted of Club members Bo Nowell (since '97), Dan Sitko ('01), Duke Emerson ('16), and friends Eric Emerson and Kip Baker (missed due to family responsibilities). Also down were alternates Dave Burnetz, Brandon Quiller and Kyle Garrison. The BaitWasters are get a bit 'long in the tooth' so working in some 'young' whipper snappers.

First couple of days were 'airish' and coolish but fishing was actually pretty good. Prominent species were slot drum, sea mullet, black drum and two sheepshead. Dan Sitko was in the zone with 4 slot red drum in 3 days.

Tuesday and Wednesday were gorgeous and, sadly, the catching fell off. Wednesday, I met up with Club member Marc Sipes and Barb and helped get Marc out of Ramp 43 for some surf fishing. Wish I could stayed but had an appointment to meet a old friend up north.

Thursday, we decided to have a four hour tournament in memory of Dick Emerson, original BaitWaster and father of Duke and Eric. We gathered off Ramp 43 just north of Cape Point for a mini four hour tournament. The water looked good but catching scoring fish was tough To score, fish had to be ≥ 11 " but only scored if \geq to minimum state regs, i.e. a puppy drum had to be ≥ 18 ". One point pre inch with a bonus 3 points per inch for fish > 20 ". Early on Duke hooked up to a line puller but, after a couple of minutes, it clearly was a big ray. He put the heat on it and popped it off.

Duke grabbed another rod and shortly was rewarded with a nice 24" puppy drum., 22 points. And number of smallish black drum, pompano, bluefish, sea mullet and assorted species were caught during the session, but the only other scoring fish was a 15" bluefish caught by me.

That night we had the traditional toast, white Russians, to our fallen anglers. We also had the traditional BaitWasters payout in 'gold doubloons (dollar coins) to the tournament winner(s). Duke swept first scoring fish, biggest scoring fish and most posts! The trifecta!!

Friday was pretty uneventful, although my home builder and his buddy pulled in next to me south of Avon and both caught puppy drum. I only managed 6-7 sea mullet. ☹️

Year 29 is in the books and, hopefully next year, Covid will be under control, the tournament will be on and some normalcy will return.

Note: in the pic the skunk flag has been turned upside down. i.e., released, thanks to Duke's puppy drum. ☺️

Two new North Carolina state record fish are also world records

MOREHEAD CITY – The N.C. Division of Marine Fisheries recently certified two new state record fish that are also certified as all tackle world record fish.

Hammonds' Gulf kingfish measured 21 inches total length (tip of the nose to the tip of the tail) and had an 11-inch girth. She caught the fish using fresh shrimp as bait on a 20 -pound test fishing line with an eight-foot Quantum, medium heavy rod and a Star Aerial EX8000 Spinning Reel.

The previous Gulf kingfish world record was a 3-pound, 1-ounce fish caught off Hatteras Island.

Craig Thompson of Southport, NC caught a 2-pound, 1-ounce creolefish in the Gulf Stream off Ocean Isle Beach on Sept. 1. and Vickie Hammonds of Wilmington caught a 3-pound, 13-ounce Gulf kingfish in Kure Beach on Feb. 4.

Previously, North Carolina did not list a state record creolefish or Gulf kingfish but created the categories after Thompson and Hammonds applied for the state record. Both fish were exceptionally large for North Carolina and were certified by the International Game Fish Association as All Tackle World Record fish.

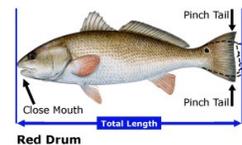

The previous creolefish world record was a 1-pound, 8-ounce fish caught off Apalachicola, Fla. Thompson's creolefish measured 17 ½ inches total length and had a 10 ¼-inch girth. He caught the fish using a cigar minnow as bait on a 50-pound braid fishing line with a 6 ½-foot Shimano Trevalia rod and an Avet SX 6/4 reel.

How to Measure a Fish

Total Length (TL) – The length of a fish as measured from the tip of the snout to the tip of the tail. **Pinch the tail to get TL.**

Species: Red Drum, Speckled Trout, Weakfish, Black Drum, Black Sea Bass, Many of the Reef Species.

Fork Length (FL) – The length of a fish as measured from the tip of its snout to the inside fork of the tail.
Species: King Mackerel, Spanish Mackerel, Sheephead

Curved Fork Length (CFL) – The length of a fish as measured on a line tracing the contour of the body from the tip of the upper jaw to the fork of the tail.
Species: Yellowfin, Big Eye and Bluefin tunas.

Lower Jaw Fork Length (LJFL) – The length of a fish as measured from the tip of its lower jaw to the fork of the tail.
Species: Blue and White Marlin. Sailfish

Coalition of Citizens and CCA NC File Lawsuit Against the State for Coastal Fisheries Mismanagement

Citing the State of North Carolina's "abject failure" in meeting its legal duties to properly manage coastal fisheries resources on behalf of North Carolina's current and future citizens, the Coastal Conservation Association of North Carolina, along with 86 North Carolinians, filed a civil action on November 10 against the State in Wake County Superior Court.

The plaintiffs include five former members of the N.C. Marine Fisheries Commission and citizens who reside in 29 counties across the state.

The suit is based on the State's longstanding, public-trust responsibilities to manage coastal fish stocks in a way that protects the public-trust rights of the public, as incorporated in the North Carolina Constitution, to fish in North Carolina's coastal waters. The complaint points out that coastal fisheries resources are held by the State in trust for the benefit of all current and future North Carolina citizens.

The State has failed to meet that legal duty, however, instead allowing for-profit exploitation of coastal fisheries resources by fewer than 7,000 citizens to supplant the public rights of 11 million citizens to use coastal fisheries resources. The complaint attributes the State's policy to "regulatory capture," where the State's regulatory agencies ultimately become co-opted to serve the commercial interests they are charged with regulating. The complaint is clear, however, that law-abiding commercial fishing license holders are not directly responsible for the poor state of North Carolina's coastal fish stocks. Instead, the complaint explains that the root cause of the demise of those stocks is the State's mismanagement of its coastal fisheries resources.

The complaint sets forth in detail specific evidence of the decades-long, uninterrupted, and dramatic overall decline in coastal fish stocks in North Carolina, and the demise of several specific fish stocks historically significant to the fishing public. The complaint discusses evidence of that decline, including fish stock age truncation, overall non-viability of coastal fish stocks, declining commercial landings, and reduced public harvest limits.

The evidence of the State's failure to meet its obligations with respect to coastal fisheries resources is overwhelming, according to the complaint: "Stocks in multiple fish species like river herring, Southern flounder, striped bass, spot, croaker and weakfish have declined precipitously since the late 1980s, with little to no will or effort by the State to implement the measures necessary to recover those stocks."

The complaint cites three critical State management failures that have infringed on the public's right to fish for personal use: (1) facilitating commercial fishing practices and gears that cause staggering amounts of resource wastage; (2) allowing chronic overfishing of multiple fish stocks historically important to the fishing public to cause stock demise; and (3) disregarding a lack of reporting of any harvest by over half of all State commercial fishing license holders.

On the first of these failures, the State has allowed long-term shrimp trawling in estuarine areas populated with juvenile fish and has facilitated a proliferation in the use of unattended gillnets. The complaint contends that because both practices result in enormous resource wastage, "all other southeastern states have either banned the practices or imposed management controls that severely curtail their wastage." Citing extensive evidence, the complaint contends that the resource wastage caused by the State's mismanagement has decimated North Carolina's spot, weakfish (grey trout) and Atlantic croaker stocks, and contributed significantly to the overfishing of Southern flounder and striped bass.

Notably, the North Carolina Division of Marine Fisheries' own studies indicate that hundreds of millions of juvenile spot, croaker and weakfish are killed and wasted annually by the shrimp trawl fishery alone. For every pound of shrimp harvested in North Carolina sounds, 3.3 pounds of juvenile finfish are killed and wasted. By the State's own analysis in 2018, that ratio equated to about 100 million spot and 800 million croaker wasted in 2014, the complaint notes. This is many times the combined Atlantic shrimp trawl fishery spot and croaker bycatch for South Carolina, Georgia and Florida, by a margin of 7.5 to 1. As a result of this wastage, stocks of spot, Atlantic croaker, and gray trout have declined from 84 to 98 percent since the State's last major fisheries management reform legislation was passed in 1997.

(Continued Next Page)

Lawsuit Against the State

The complaint also cites the fact that the NC Division of Marine Fisheries obtained and holds on behalf of commercial gillnetters two Incidental Take Permits under the federal Endangered Species Act, so that gillnetting can continue in North Carolina waters despite the harm gillnets cause to fish stocks and threatened and endangered sea turtles and Atlantic sturgeon. The permits are one of many indications of regulatory capture, the suit charges.

As a second "critical management failure," the complaint goes into an in-depth history of how State-tolerated, chronic, long-term overfishing led to the demise of river herring, draconian reductions in the Southern flounder harvest, and the near collapse of striped bass in the state's southern rivers.

As far back as 1989, State data indicated southern flounder stocks were overfished, and that overfishing was actively occurring. After decades of inaction, draconian reductions in the harvest of Southern flounder have now become necessary to end overfishing of that stock. Even so, the suit charges, the State has acted with no sense of urgency to end overfishing and attain a sustainable harvest as required by the Fisheries Reform Act of 1997. As David Sneed, Executive Director of CCA NC notes, recent data indicate that "the drastic Southern flounder harvest reductions finally put into place in 2019 and 2020 are inadequate and are falling far short of their stated goals."

North Carolina striped bass management also illustrates the State's failure to address overfishing of public-trust fisheries resources, and the loss of public-trust rights resulting from that mismanagement, the suit explains. In the 1990s, the State imposed substantial harvest restrictions to turn around sagging striped bass stocks in the Albemarle Sound Management Area. The State, however, did not apply those same restrictions to the striped bass stocks in the Central and Southern Management Area, even after they worked to restore the Albemarle Sound stock. As a result, the more southern North Carolina striped bass stocks have collapsed, and the only reason that any striped bass are in southern rivers is a federal stocking program that costs taxpayers \$750,000 annually.

The State's third critical management failure pertains to the State's approach to commercial fishing licenses. The State's data show that over the last decade, 58 percent of North Carolina's commercial fishing licensees annually reported no landings, for any trip, even though North Carolina law requires that all landings be reported and recorded. If those "latent licenses" are not being used for fishing, they still represent an enormous commercial harvest potential that could be brought to bear at any moment. Substantially more likely, according to evidence cited in the complaint, those licenses are fished without their landings being recorded and reported to the Division, making stocks seem more abundant than they really are.

The complaint asks the Court to declare that the State has breached its legal obligations to properly manage coastal fisheries resources, as well as a permanent injunction to stop the State from committing further breaches of these obligations. In short, the complaint seeks to hold the State accountable for failing to manage our coastal fisheries resources for the benefit of all North Carolinians.

The lead attorneys in the lawsuit are Keith Johnson and Drew Erteschik at Poyner Spruill LLP, who will work closely with Dr. Tim Nifong, CCA NC's General Counsel.

There are at least three ways you can assist in this fight.

First, you can contribute to the legal fund for this lawsuit. 100% of your contribution will go toward funding the legal costs of the lawsuit.

Second, you can potentially join the lawsuit as a co-plaintiff. While there are rules that must be followed, any state citizen who fishes on the coast, or any environmental non-profit organization, public saltwater fishing organization, or environmental justice organization that operates in North Carolina and has an interest in halting the demise of state public-trust fisheries resources is welcome to join our lawsuit. To find out more about joining the suit, contact David Sneed at david@ccanc.org.

Third, you can become a member of CCA NC, joining with other conservationists to solidify the voice for change with respect to responsible public fisheries resource management.
